

# Nonprofit Endowment Funds

Dollars that meet the present and future needs of a charity

The Community Foundation is an expert in managing charitable endowments. Nonprofits are experts in managing their causes. **A Nonprofit Endowment Fund combines an organization's mission with a donor's endowment for lasting impact.**

## Sustainability matters

Nonprofit Endowment Funds are created for the benefit of a select organization by providing ongoing support. The donor specifies how endowed funds are to be used, and the Community Foundation provides ongoing stewardship and oversight to ensure the donor's intentions are fulfilled.

## Support your cause forever

You already faithfully support organizations you care about. A nonprofit fund allows you to continue to support its mission in your name forever. If the nonprofit you select ceases to exist or cannot fulfill its mission, the Community Foundation will redirect the fund so it continues to address your original charitable intent.

## Join nonprofits in planning for the future

Many local nonprofits have established endowment funds at the Community Foundation as a simple, efficient way to develop sustainability for their organization. We handle investment management and administrative responsibilities related to the endowment. The organization's staff and volunteer hours may then concentrate on fulfilling their mission.

You may give to any of these nonprofit endowment funds. Your gift will benefit the organization in perpetuity. We can facilitate even the most complex planned gifts as well as gifts of appreciated stock or real estate.
